

Template Week 7 – Host your website on GitHub

Student number:569527

Domain name (URL) of your website on GitHub:

<https://inspiractus01.github.io/michal.github.io/>

Relevant screenshots + motivation:

The image shows a GitHub repository named 'michal.github.io' (Public) with 1 branch and 0 tags. The repository contains a README.md file and several HTML and CSS files. The 'About' section on the right indicates no description, website, or topics are provided. The 'Releases' section shows no releases published. The 'Packages' section shows no packages published. The 'Deployments' section shows a deployment to 'github-pages' 15 minutes ago. The 'Languages' section shows a bar chart with HTML at 86.4% and CSS at 13.6%.

The bottom part of the image shows the 'GitHub Pages' settings for the repository. The 'General' tab is selected, showing the site is live at <https://inspiractus01.github.io/michal.github.io/>. The 'Build and deployment' section shows the site is currently being built from the 'main' branch. The 'Custom domain' section shows no custom domain is configured.

Ready? Save this file and export it as a pdf file with the name: **week7.pdf**
